

EVANGELISTA, JAN ILYZZA V.

Frontend Developer

ilyzzaevanz@gmail.com | 09953462205 | [Github](#) & [LinkedIn](#)

Professional Summary

Frontend Developer with 4+ years of experience building enterprise web applications using Vue.js, Nuxt.js, Vuetify, and Laravel APIs. Experienced in developing HRMS, Inventory Management, Information Resource Management System, and Job Portal systems with a focus on performance, scalability, and user experience. Strong background in reusable component development, state management using Pinia/Vuex, and API integration.

Technical Skills

Frontend

- Vue 2, Vue 3
- Nuxt 2, Nuxt 3
- Vuetify 1/2/3
- JavaScript (ES6+)
- HTML5, CSS3, SCSS
- Composition API
- Responsive Web Design
- Single Page Applications (SPA)
- Server-Side Rendering (SSR)
- TypeScript

Development Practices

- Git Version Control
- Agile/Scrum
- Code Review
- Performance Optimization
- Cross-Browser Compatibility

Visualization

- ApexCharts & Chart.js

Backend Integration

- REST API
- Laravel
- Laravel Echo
- Pusher
- Socket.IO
- Axios / Fetch API

State Management

- Pinia
- Vuex

Tools

- Git
- Vite
- Webpack
- CKEditor
- TipTap
- ExcelJS
- jsPDF

Experience

Software Engineer II – July 2024 - Present

Massive Integrated Tech Solutions Inc.

- Designed frontend development of scalable **SPA architecture** using **Vue.js 3, Nuxt.js 3, TypeScript, and Vuetify 3**, defining reusable patterns and improving overall system structure and maintainability.
- Designed and standardized **frontend architecture patterns** including composables, state management structure, and reusable component libraries used across multiple modules.
- Owned integration of complex **Laravel RESTful APIs**, improving data flow design, response handling, and frontend-backend contract consistency.
- Implemented and optimized **real-time event-driven features** using **Laravel Echo, Pusher, and WebSockets**, supporting live system updates at scale.
- Improved application performance through **Pinia state architecture redesign, caching strategies, and API optimization**, reducing unnecessary data calls and improving rendering efficiency.
- Led **technical coordination with backend developers**, defining API structure improvements and system-level integration standards.

- Reviewed frontend code and provided technical guidance during development cycles to ensure consistency, performance, and maintainability.
- Contributed to **Agile delivery planning**, focusing on estimation, architecture discussions, and sprint-level technical direction.

Software Engineer I – May 2022 – July 2024

Suiterus Technologies Inc.

- Developed and maintained **Vue.js 2 and Nuxt.js 2 SPA features** based on assigned tasks and UI/UX specifications.
- Built reusable **Vue components and modular UI elements**, supporting consistent implementation across multiple application modules.
- Integrated frontend with **Laravel REST APIs using Axios**, handling authentication, CRUD operations, and data presentation layers.
- Developed dashboards and reporting interfaces using **Chart.js and ApexCharts** for business reporting needs.
- Implemented UI improvements including **responsive layouts and cross-browser compatibility fixes**.
- Participated in **Agile Scrum workflows**, including sprint tasks, code reviews, and team collaboration using Git.

Key Projects

Human Resource Management System (HRMS)

Enterprise HR platform for employee management

- Built modules for HR, Payroll, SPMS, Timekeeping, Roles, Approvals, Notifications, and Audit Trail
- Supported 1,000+ users and processed 10,000+ monthly transactions (attendance, payroll, approvals)
- Improved performance by ~30%–40% through API and frontend optimization
- Implemented real-time notifications and role-based access control

Inventory Management System

Multi-location inventory and asset tracking system.

- Developed modules for Items, Storage, Locations, and Inventory Reports
- Managed 5,000+ inventory records with real-time updates and filtering
- Reduced manual tracking effort by ~50% through automation
- Improved reporting and data retrieval performance by ~35%

Information Resource Management System (IRMS)

Internal IT ticketing and asset management platform.

- Built Ticketing, IT Services, Asset Lifecycle, Bugs, and Feedback modules
- Handled 3,000+ monthly support tickets with workflow-based tracking
- Reduced resolution time by ~25–40% through process automation
- Improved IT asset tracking and lifecycle visibility

Job Portal System

Recruitment and applicant tracking platform.

- Built Jobs, Applications, Users & Roles, Reports, and Notifications modules
- Processed 1,000+ monthly job applications
- Improved application handling efficiency by ~30% via optimized UI and filtering
- Implemented role-based recruitment workflow and notifications

Education

Bachelor of Science in Information Technology

Our Lady of Fatima University (2018-2022)

Certification

[Vue – The Complete Guide](#) (incl. Router & Composition API)
