Professional Summary

Frontend Developer with 4+ years of experience building scalable enterprise web applications using Vue.js, Nuxt.js, TypeScript, and Laravel REST APIs. Experienced in frontend architecture, reusable component systems, state management, performance optimization, and real-time applications supporting 1,000+ users. Passionate about building maintainable, high-performance user interfaces in Agile environments.

Technical Skills

- Languages: JavaScript (ES6+), TypeScript
 - Frontend: Vue.js 2/3, Nuxt.js 2/3/4, HTML5, CSS3, SCSS, Vuetify
 - State Management: Pinia, Vuex
 - Backend & APIs: Laravel, REST APIs, Axios, Fetch API
 - Real-time: WebSockets, Pusher, Laravel Echo
 - Build Tools: Vite, Webpack
 - Version Control: Git
 - Data Visualization: ApexCharts, Chart.jsCore
-

Competencies

- Frontend Development
 - Frontend Architecture
 - Component Architecture
 - REST API Integration
 - State Management
 - Performance Optimization
 - Responsive Design
 - Real-time Applications
 - Agile/Scrum
 - Code Review
-

Experience

Software Engineer II (Frontend Developer)

Massive Integrated Tech Solutions Inc. | July 2024 – Present

- Designed and maintained scalable enterprise SPAs using Vue.js 3, Nuxt.js 3, TypeScript, and Vuetify, improving application maintainability and long-term scalability.
- Established frontend architecture standards using composables, Pinia, and reusable component libraries, reducing code duplication and improving development consistency.
- Integrated and optimized Laravel REST APIs, improving frontend-backend communication, reliability, and application performance.
- Developed real-time features using Laravel Echo, Pusher, and WebSockets, enabling live notifications and workflow updates.

- Improved application performance through state management optimization, API request reduction, lazy loading, and caching strategies, reducing unnecessary network requests.
- Collaborated with backend engineers on API design, system architecture, and technical planning to streamline feature delivery.
- Performed code reviews, mentored developers, and contributed to Agile ceremonies including sprint planning, estimation, and technical design discussions.
- Delivered enterprise systems including HRMS, Inventory Management, IRMS, and Job Portal, supporting 1,000+ active users, 10,000+ monthly HR transactions, 5,000+ inventory records, and 3,000+ IT service requests.

Software Engineer II (Frontend Developer)

Suiterus Technologies Inc. | May 2022 – July 2024

- Developed responsive SPA features using Vue.js 2, Nuxt.js 2, JavaScript, and Vuetify for enterprise web applications.
- Built reusable UI components and modular frontend architecture, improving development efficiency and code maintainability.
- Integrated Laravel REST APIs using Axios for authentication, CRUD operations, and business workflows.
- Developed interactive dashboards and reporting tools using ApexCharts and Chart.js to visualize operational metrics.
- Improved user experience through responsive design, cross-browser compatibility, and frontend performance optimization.
- Contributed to HRMS and Job Portal systems supporting recruitment, employee management, and application tracking workflows.
- Participated in Agile development, code reviews, testing, and Git-based collaboration to deliver production-ready features.

Education

Bachelor of Science in Information Technology

Our Lady of Fatima University (2018-2022)

Certification

[Vue – The Complete Guide](#) (incl. Router & Composition API)

Instructor: Maximilian Schwarzmüller
